

Course duration

- 1 day

Course Benefits

- Learn what to expect from the exam.
- Learn how the exam is structured, including question types.
- Learn to determine how questions relate to AWS architectural concepts.
- Learn how to interpret the concepts being tested by an exam question.
- Learn how to allocate your study time for the exam.

Authorized AWS Training

Webucator has partnered with an Authorized AWS training delivery partner to offer official AWS courses utilizing Amazon Authorized Instructors.

Class Materials

Each student will receive a comprehensive set of materials, including course notes and all the class examples.

Class Prerequisites

Experience in the following *is required* for this AWS class:

- At least one year of hands-on experience designing and deploying scalable, highly available, and fault-tolerant systems on the AWS platform.
- In-depth knowledge of at least one high-level programming language.
- Knowledge gained from course Architecting on AWS or equivalent knowledge.
