

If you need a course on a different date or time than the public offering, or if you need an instructor-led course delivered for your organization, we can provide a private training option. InterSource offers onsite training throughout Europe, with most delivery involving customization of content, language or both, to meet client requirements.

- *To Purchasing Onsite Training*
 - *Contact us regarding your requirements.* We will ask questions aimed at understanding your exact needs.
 - *Review a Detailed Outline:* we will present you with an outline detailing exactly what will be covered in your course and a proposal detailing the cost of the training.
 - *Purchase Training:* if your experience has been good so far, the outline matches your need and the price is right, then sign the proposal and we can schedule the training.
- *Delivery Locations:* Our private classes are normally delivered at your offices, but can be delivered at a different location of your choice, at the [InterSource Training Center](#) near the Geneva airport, or via a web conference (a good option for geographically dispersed groups).
- *Class size:* Generally, an organization will need to have at least four students in a class for it to be cost effective to bring an InterSource trainer onsite.
